Email: parasrajput@gmail.com
Mobile: +91-8273436813

## SKILLS

**Languages:** C++, C, Python, JavaScript, Java
**Data Science Tools:** NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn
**Tools/Platform:** Git, Jupyter Notebook, Google Colab, VS Code, Figma
**Machine Learning:** Regression, Classification, Clustering, NLP, Deep Learning
**Soft Skills:** Communication, Problem Solving, Teamwork, Adaptability

## TRAINING

**Summer PEP Training |** ByteXL — July 2025

- Completed an intensive, hands-on industry-oriented training program focused on problem-solving, algorithmic thinking and coding fundamentals.
- Strengthened C++ programming fundamentals, including efficient memory usage, STL, and coding best practices.
- Gained strong proficiency in Data Structures & Algorithms (DSA), covering trees, graphs, recursion, backtracking, greedy algorithms, dynamic programming, sliding window, and hashing techniques.
- Solved and practiced a wide range of DSA and CP programming problems on LeetCode, GeeksforGeeks, Codeforces, and CodeChef, significantly improving time complexity optimization and problem-solving speed.

## PROJECTS

**Deposit Amount Prediction using Machine Learning** | GitHub — December 2025

- Developed an end-to-end machine learning system to forecast deposit amounts using institutional attributes such as the number of offices and accounts.
- Conducted data preprocessing, exploratory data analysis (EDA), and correlation analysis to identify key factors influencing deposit growth.
- Evaluated multiple regression models, including linear, tree-based and kernel-based methods and enhanced performance through hyperparameter tuning and cross-validation.
- Achieved approximately ~92% accuracy in deposit forecasting.
- *Tech: Python, Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn*

**Aviation Crash Analysis** | GitHub — April 2025

- Performed large-scale data analysis on 14,500+ aviation accident records from the U.S. Government's Data.gov aviation safety dataset, spanning multiple years and diverse aircraft categories.
- Performed end-to-end data cleaning and preprocessing, including missing value treatment, date normalization, categorical encoding, and outlier detection to enhance data quality and consistency.
- Conducted exploratory data analysis (EDA) to uncover key safety trends across crash causes, aircraft types, geographic regions, and seasonal/time-of-day patterns.
- Built interactive visualizations to explore accident frequency, fatality rates and risk factors by state, aircraft model, and weather conditions.
- *Tech: Jupyter Notebook, Plotly, SciPy, Matplotlib, Seaborn, Pandas, NumPy*.

## CERTIFICATIONS

- Privacy and Security in Online Social Media — NPTEL | October 2025
- Web Application Technologies and Django — University of Michigan (Coursera) | October 2025
- Build Generative AI Apps and Solutions with No-Code Tools — Infosys | August 2025

## ACHIEVEMENTS

- **Secured 3-star rating on CodeChef** — September 2025
  among 500k+ participants in CodeChef contests.
- **Attained a prominent global ranking at 4583rd** — August 2025
  among 10k+ participants in Codeforces Div. 2.

## EDUCATION

**Lovely Professional University** — Phagwara, Punjab
Bachelor of Technology | CSE | CGPA: 7.5 — Aug 2023 – Present
**St Mary's Convent Sr. Sec. School** — JP Nagar, Uttar Pradesh
Intermediate | Percentage: 88% — Apr 2021 - Mar 2022
**St Mary's Convent Sr. Sec. School** — JP Nagar, Uttar Pradesh
Matriculation |Percentage: 92% — Apr 2019 - Mar 2020
